Regulamentos REACH e CLP  
+ Workshop  
27 novembro 2017

# Avaliação de Riscos e prática laboratorial em Química: segurança, investigação e ensino

*Diana Cláudia Pinto, Departamento de Química*

organização:

decivil  
universidade de aveiro  
departamento de engenharia civil

dq  
universidade de aveiro  
departamento de química

ACT  
AUTORIDADE PARA AS  
CONDICIONES DO TRABALHO

# Personal conduct inside the buildings/laboratories

Conduct yourself in a responsible manner by respecting the laboratorial safety rules!

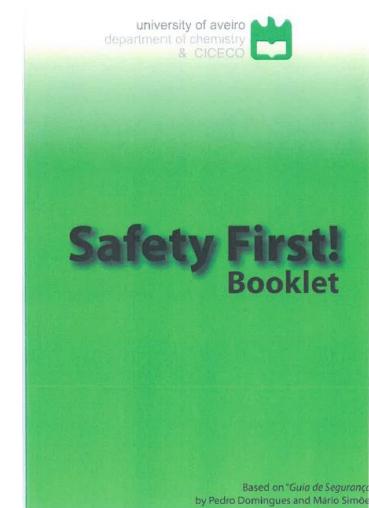

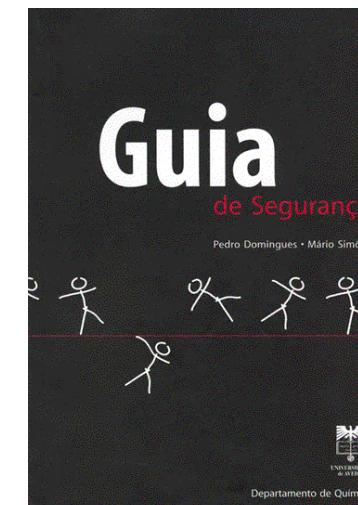

- ★ *Safe working protects:*
  - ◆ *You*
  - ◆ *Other lab workers*
  - ◆ *Cleaners*
  - ◆ *Visitors*
  - ◆ *Your work*

# Personal conduct inside the buildings/laboratories

- ❖ A Chemical Laboratory is a potential hazardous working place!
- ❖ In the Chemistry Department we act as if our buildings are big laboratories.
- ❖ Inside the laboratory (also in the building) there are several compounds and scientific equipment.
- ❖ All laboratorial activities involve risks (accidents can happen!).
- ❖ Aim: risk assessment for risk mitigation.

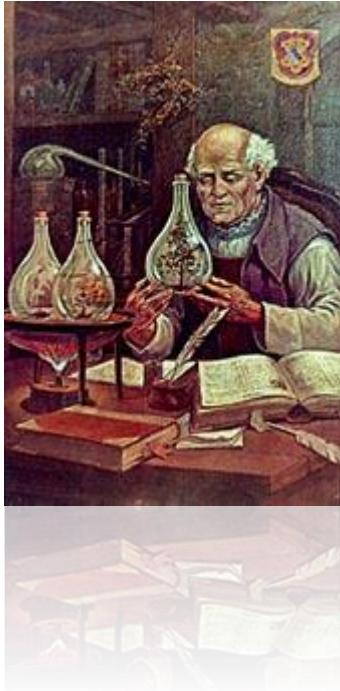

We have documents produced by the Safety Committee in Portuguese “Guia de Segurança” and in English “Safety First!”

# Personal conduct inside the buildings/laboratories

- ❖ General recommendations;
- ❖ Access to the Chemistry Buildings and Laboratories;
- ❖ Procedures in case of an emergency;
- ❖ Standard procedures for working with Human body fluids and tissues, micro- or nano-particles, and gases (compressed gas cylinders, cryogenic gases, piped gases);
- ❖ Risk assessment;
- ❖ Standard procedures for working with hazardous chemicals;
- ❖ Laboratory waste disposal.

# Risk assessment / Standard procedures for working with hazardous chemicals

*“Sola dosis facit venenum”*

Only the dose makes the poison

Paracelus (1493-1541)

All things are poison, and nothing is without poison.

# Risk assessment / Standard procedures for working with hazardous chemicals

## Material safety data sheet (MSDS) Fundamental in risk assessment

Material Safety Data Sheet: important document containing detailed information about a compound physical, chemical and toxicological properties. Includes information about handling and security procedures. The MSDS reading is mandatory in the Chemistry Dep.

# Risk assessment / Standard procedures for working with hazardous chemicals

The form is divided into several sections:

- I. Docente / Investigador Responsável Supervisor** (Teacher / Researcher Responsible Supervisor)
- Contacto Contact**
- II. Substância Compound**
  - Name / Name
  - CAS
  - Note: adicionar MSDS em anexo / Note: add MSDS as an attachment
  - Local de utilização / Room / Laboratory
  - Periodicidade de Use / Periodicity of Use
  - Período de utilização / Period of Use
  - Quantidade máx. a usar / Max. quantity to be used
  - Local de Armazenagem / Storage location
  - Quantidade a adquirir / Quantity to be purchased
- III. Descrição do modo de utilização da substância** (Description how the compound will be used)
- IV. Investigadores que poderão ser expostos à substância perigosa** (Researchers who may be in contact with the hazardous compound)
  - Investigadores autorizados a utilizar a substância
  - Authorized researchers to use the compound
- V. Descontaminação e eliminação** (Decontamination and elimination)
  - Métodos de descontaminação
  - Decontamination procedures
  - Metodos de limpeza da área de trabalho (incluso equipamento e bancadas)
  - Workplace cleaning procedures (including equipment and benches)
  - Procedimentos de eliminação (intermediários, resíduos e substância não usadas)
  - Removal procedures (intermediate compounds, residues and unused compound)
- VI. Procedimentos de emergência (inalação, ingestão e inoculação)** (Emergency procedures (when inhaled, ingested and for inoculation))
- Assinaturas Signatures**
  - Orientador(es) Supervisor(s)
  - Utilizador(es) User(s)
  - Data Date

The use of substances that pose significant threats to human health (carcinogens, embryotoxins, special toxicity and potential explosive) is only permitted after submission of a form to the Safety Committee.

# Laboratory waste disposal

**Elimination of chemical residues or dangerous substances directly to the Environment is forbidden!**

- ❖ Small amounts of chemical residues;
- ❖ Recycling;
- ❖ Waste disposal.

# Laboratory waste disposal

  
 university of aveiro  
 department of chemistry

## Serviço de Recolha de Resíduos

Chemical Waste Disposal Service

<b>Telefones</b>	<b>Telephones</b>												
<b>D.Q. / L.T.</b>	<b>Outro Other</b>												
<b>Responsável pela segurança:</b> <i>Head of Safety Commission:</i>													
<p>Este registo deve ser preenchido para todos os resíduos a eliminar.</p> <p>*Quando os resíduos a eliminar pertençam às classes 1, 4, 5 ou 6 exige-se a assinatura do responsável pela segurança.</p> <p>This form should be filled for all chemical waste to eliminate.</p> <p>*If the chemical waste to eliminate belong to categories 1, 4, 5 or 6 the signature of the head of the Safety Commission is mandatory.</p>													

# **Procedure for the elimination of residues**

- ❖ Identify the category to which the chemical residues belong;
  - ❖ Store chemical residues in appropriate vessels (properly labelled) for elimination by the contacted company

# Safety Day

- ❖ Besides the daily procedures associated to safety assessment, the Chemistry Dep. organizes a thematic Day dedicated to this issue
- ❖ This event is open to ALL and project/master students are encouraged to participate.

**Dia da Segurança Laboratorial**  
**13 de dezembro de 2017**  
**(Anfiteatro 15.1.59 às 15h)**

- ❖ *Regras gerais para prevenção de acidentes;*
- ❖ *Tratamento e eliminação correta de resíduos;*
- ❖ *Plano de evacuação dos edifícios*
